Network access to this equipment is isolated from the Internet. We use network segmentation for isolation of services which need different levels of security from each other. In addition, we restrict logical access to your data for our employees on a "need to know" basis. So, only the personnel that really require access to your data for the purpose of providing you with our best service, will have access to it.

Threats protection. We are highly knowledgeable about modern threats to data security and privacy, and we are well-prepared to combat them. All events that occur in our infrastructure are continuously monitored, analyzed and responded to, which allows us to ensure proper protection of your data, keeping it safe from threats, vulnerabilities, and the effects of malware.

In the event of a failure that affects the accessibility of your data, we have data backup and recovery procedures in place that will help us restore your data in a short time. To guarantee quick recovery, we use high availability mode enabled for most critical databases, which allows us to minimize downtime.

If you choose not to give your personal information. In the context of our business relationship, we may need to collect data by law, or under the terms of a contract we have with you. Without this data, we are, in principle, not in a position to close or execute a contract with you.

If you choose not to give us this data, it may delay or prevent us from meeting our obligations. It may also mean that we cannot perform services needed to run your accounts or policies.

To what extent we carry automated decision-making and profiling. In establishing and carrying out a business relationship, we generally do not use automated decision-making. If we use this procedure in individual cases, we will inform you of this separately. In some cases, we may proceed with profiling in order to evaluate certain personal aspects. We shall inform you accordingly in case we perform any profiling. In general, any data collection that is optional would be made clear at the point of collection.
